

# CH Vambies!

Thank you for downloading our Vambie CH puppets. We hope that you have lots of fun creating amazing videos with our characters. Please do read the following, because not only do we introduce who the Vambies are, but we have an instructional tutorial video that both new and seasoned CH users will find useful.

## What are the Vambies?

The Vambies are an avatar collection developed by Vambie Inc. and Taiyaki Studios. A quirky cast of vampire/zombie hybrids, they are being released into the world on the Adobe Character Animator free download page and will be appearing throughout social media.

To celebrate the launch, Adobe has provided us with a few free CC Subscriptions to give away. This is NOT a competition, you don't have to be the best, get the most votes, nothing, all you have to do is make a Vambie video with our Adobe CH Vambie puppets and we will be giving those available Adobe Creative Cloud subscriptions away randomly to vambie video creators. Create your video and share it online to get involved, and of course, make sure to tag in Taiyaki studio so we can see what you've done.

## The Vambie story

Taiyaki Studios mascot and metaverse tour guide 'Mr Yaki' travels to meet Dan, the creator of the Vambies, who explains to him the origins of the Vambies: <https://youtu.be/mX2ysX9ssl4>.

This video was created using Reallusion's iClone and the Unreal Engine. For a behind the scenes look at how Taiyaki Studios uses Reallusion software to produce its videos, check out their latest 'making of' video: <https://www.youtube.com/watch?v=19Isi4SAzHw>.

## Who are they for?

The Vambies are a community-driven animated show living on social media. Anyone interested in character animation and creating fun content is welcome to download a Vambie and begin producing video. Creators can use Vambies for free and monetize their creations with no royalties. You can read our non exclusive license agreement here [TaiyakiContent](#)

We have a dedicated team of experts ready to help in our discord channel <https://discord.gg/mWWS84gS> and it's also a place to share your work and ideas and even collaborate with other Vambie creators.

## How to use CH Vambies

Scott Evans of Taiyaki Studios has put together an extensive video that teaches users how to download and animate Vambies in Adobe Character animator. This in depth video explains in detail how to use CH and it also offers lots of tips on how to speed up your process. You can watch the video here: <https://youtu.be/6s8xA-r3fQU> Also **note** that WALK and BODY TRACKER behaviors are turned off in PRO mode as default, but can easily be turned back on. This is due to those behaviors requiring more processing power and may cause the character to lag on some systems . If you would like to use these options, simply turn them on in the right hand side behavior panel. If you are unsure how to do this, please do check out our tutorial video.

## Performer Modes

There are two versions of our Vambies available. Pro mode, as demonstrated in the Youtube tutorial link above and Starter mode, which is for beginners.

To operate Pro mode, users will have to have access to Adobe CC and download Adobe Character Animator. A free 7 day trial is available. STARTER mode is completely free and Adobe CC is not needed to operate the puppets (see here for more information about Starter mod <https://youtu.be/3TGOhyqJbJ0>)

## About Vambie Inc

Dan was born a vampire but accidentally bit a zombie and found himself turned into a hybrid. Shunned by both the vampire and zombie communities, he founded Vambie Inc. to manufacture clones of himself - the Vambies - and spread them into the world.

## About Taiyaki Studios

Taiyaki Studios builds avatars for vtubers and virtual influencers. The future of media is social-first, powered by virtual characters, and supercharged by fan-generated content. We're here for it. <https://taiyakistudios.com/> <https://www.youtube.com/c/TaiyakiStudios>
